PROFESSIONAL SUMMARY

Software Engineer with expertise in **Systems/Embedded C++** and **Enterprise Java/Spring Boot** and **Full-Stack AI integration**. Currently managing mission-critical financial infrastructure for major European banks (LaCaixa, Sabadell) at Fujitsu. Specialist in XFS standards for ATM middleware and high-throughput backend services. Proven track record in delivering high-efficiency code with a minimal latency and footprint.

PROFESSIONAL EXPERIENCE

Fujitsu <i>Software Engineer (Application Developer)</i>	Barcelona, Spain (Hybrid) November 2024 – Present
Project Group 1: ATM Banking Middleware (LaCaixa)	
- Designed and maintained Device APIs and Service Providers for a fleet of 11,000 ATMs nationwide, ensuring 24/7 availability for critical banking operations. - Implemented XFS standards (v3.0 to v3.5) for hardware modules like card readers, cash dispensers, PIN pads, etc. - Optimized resource consumption through efficiency-by-design in C++, achieving minimal CPU and memory footprints in service execution.	
Project Group 2: Financial Monitoring & KPI Suite (Banco Sabadell)	
- Maintained a multi-module Java 8/Java 21 with Spring Boot suite processing 50,000–100,000 financial records daily for real-time monitoring and KPI generation. - Engineered database performance improvements using B-tree/Bitmap indexes and Materialized Views in Oracle, off-loading complex calculations from the application layer. - Developed interactive dashboards using AngularJS, D3.js and Apache ECharts, delivering sub-second response times for complex financial queries via optimized JDBC/Oracle layers.	
CivEnhance (EU Project - La Salle R.L.) <i>Lead Full-Stack Developer</i>	Barcelona, Spain Nov 2024 – July 2025
- Spearheaded the end-to-end development of an intelligent matchmaking platform using Astro, React, Express, and Node.js to connect European universities with rural community projects. Architected a hybrid AI chatbot: implemented a custom keyword-scoring algorithm for FAQ matching with an automated fallback to Google Gemini LLM for complex queries and personalized recommendations, achieving a 95% accuracy rate in intent recognition and 100% user satisfaction (80% Very Satisfied) with the recommendations. Engineered a high-performance recommendation engine using PostgreSQL and batch processing logic, achieving API response latencies between 3ms and 55ms. Implemented complete internationalization (i18n) for 6 languages and ensured 100% compliance with WCAG accessibility standards, delivering a seamless UX for diverse stakeholders. Validated system robustness via Cypress E2E testing and Docker-based deployment, ensuring 100% functional coverage for the MVP launch.	
La Salle URL <i>Teaching Assistant (Digital Systems & Microprocessors)</i>	Barcelona, Spain July 2023 – July 2024
Mentored 200+ students on low-level microprocessor architecture and assembly/C programming.	

TECHNICAL SKILLS

- Languages:** C, C++, Java, SQL (Oracle/PostgreSQL), Python, JavaScript, HTML/CSS.
- Frameworks & Libraries:** Spring Boot, Hibernate, XFS Standard (3.0-3.5), Express.js, RPC/XDR, Astro, React, Vue.js, D3.js, Apache ECharts.
- Tools & DevOps:** Docker, Cypress (E2E Testing), Git, Maven, RPC/XDR, CI/CD.
- Methodologies:** Agile (Scrum), Waterfall, Jira, Technical Documentation.

EDUCATION

Bachelor in International Computer Engineering La Salle Ramon Llull University (ETSELS), Barcelona.	2021 – 2025
---	-------------

LANGUAGES & CERTIFICATES

- English:** C1 Advanced (Cambridge University) - Fully proficient in professional environments.
- Spanish & Catalan:** Native.
- French:** Elementary (A2 - Actively learning).
- Microsoft Certified:** [Azure Fundamentals](#)
